OFFICIAL GROUNDS FOR CLAIM REPUDIATION (CLAUSE 4.3 — PRE-EXISTING DISEASE EXCLUSION):

Upon medical scrutiny of the pre-authorization docket submitted by Kokilaben Hospital, our Claims Medical Panel observed that patient Alex presented with lumbar spinal extrusion and neural compression. Under Clause 4.3 (Pre-Existing Disease Exclusion) of Star Comprehensive Health Policy Terms: "All Pre-Existing Diseases (PED) and any condition or complication arising therefrom are permanently excluded until the expiry of 36 months of continuous coverage."

The Insurer alleges that degenerative lumbar spinal disc disease is chronic/progressive in nature and inherently predated policy inception, indicating non-disclosure of material medical history at proposal. Cashless authorization is hereby REPUDIATED. Hospital is directed to collect charges from the patient directly.

HOSPITAL CLINICAL EVIDENCE TRANSCRIBED FROM EMERGENCY MEDICAL RECORDS:

Patient Alex (34/M) presented to Kokilaben Emergency at 18:45 on 24-Sep-2026 with sudden acute excruciating sciatic agony following heavy deadlift strain at gym 2 hours prior. Urgent Lumbar Spine MRI (Report #RAD-2026-9810) confirms Acute Extruded Disc Fragment at L4-L5 with severe neural canal compression. Baseline OPD history notes nil past history of lumbar pathology or chronic spinal complaints. Treating spine surgeon Dr. Rao certified the trauma as acute onset necessitating urgent decompression to avoid permanent nerve root deficit.
